# Weekly Coal Production

Energy Information Administration  
Washington, D C

Production for Week Ended:  
May 25, 1985

Published:  
June 3, 1985

# Highlights

U.S. coal production in the week ended May 25, 1985, as estimated by the Energy Information Administration, totaled 17.89 million tons (bituminous coal and lignite, 17.81 million tons; Pennsylvania anthracite .08 million tons). This was 0.8 percent higher than in the previous week, and was 7.4 percent lower than the production in the corresponding week of 1984.

Cumulative U.S. coal production from January 1 through May 25, 1985 was estimated at 353.23 million tons, 2.8 percent below the 363.56 million tons produced in the comparable period in 1984.

The methodology used to make weekly estimates of coal production was last published in the Weekly Coal Production (DOE/EIA-0218(84/40)).
